

Central
European
Exchange
Program of
University
Studies

CEEPUS is a regional program, improving educational process and experiences utilizing exchange mobilities for students and teachers, conjoint excursions and university partnership with emphasis on Joint PhD Programs. The agreement had been signed by 16 countries, in successive steps along the Danube river (from AUSTRIA to BULGARIA) and from Balkan region incl. the new state KOSOVO. CEEPUS activities represent multiple university networks, operating joint programs ideally leading to Joint Degrees. By the medium of National CEEPUS offices the mobility grants for students and teachers are covered. From May, 2011 CEEPUS III has entered into force for a period of 7 years.

Our Faculty B.E.R.G., namely Institute of Geosciences participate within the CIII-RO-0038 network “Earth-Science Studies in Central and South-Eastern Europe”. It works among the 18 universities (from 10 states), that offer more detailed geological study focused to fundamental geological research or applied geosciences. Incorporated faculty units deal with wide spectrum of geologically based subjects from hard/soft-rock petrology to sedimentology, mineralogy, geophysics, hydrogeology up to archeometry or environmental studies.

The network exchange mobilities are planned for each academic year. Stays for both categories **students and teachers** are prepared in respect to local coordinators mutual agreements and runs according to approved Traffic sheet, covered by equal scholarships. Each participant has to hold required obligations. Presently the emphasis is laid on advanced forms, that includes PhD-study co-supervised by two of universities, and innovative approaches to teaching. Mutual collaboration can offer analytical equipment and advisory background, surely helpful for each student's or teacher's research. Already 14 PhD-programs are running co-supervised by 11 universities.

The **Faculty B.E.R.G. of Techn.Univ. Košice (Inst. of Geosciences)** specialize mostly in a field of soft-rock geology, namely sedimentology, but offer study subject related to Tectonics, Mineral deposits, Hydrogeology and Technical mineralogy too. If you are interested to participate this program either as student or teacher, don't hesitate and contact the:

Local coordinator: Ing. Marta Prekopová, PhD.

He will be pleased to inform you about the conditions of your visit abroad.
